

UniDrive[®] Motor 100 Watt, Heavy Duty 110287

The UniDrive[®] motor has just one moving part, operates almost silently and gives you unprecedented flexibility in manufacturing lead time.

The new UniDrive[®] motor is a solution offering greater reliability and design freedom. The system is remarkably simple and cost effective. It consists of an externally-mounted direct drive brushless DC motor and an electronic speed control.

Extreme Reliability: 300,000 Hour Bearing Life

The new UniDrive[®] system uses an extremely reliable 4 $\frac{5}{8}$ -inch diameter brushless DC servo-motor with an electronically-controlled operating speed of just 280 RPM. It produces high torque at low speed without using failure-prone gear reducers, linkages or drive chains. The net result of the low speed combined with the robust bearings is a 310,000 hour calculated bearing life (L_{10} ANSI/AFBMA Std 9-1978.)

Almost Silent Operation

The UniDrive[®] motor is almost silent in operation at full power. There are no gears, drive chains or other moving parts to generate noise.

Plug and Play Simplicity

The UniDrive[®] motor controller is a rugged, reliable device that gives you a simple plug and play connection. You control your manufacturing lead-time.

Simple to Service

If a motor ever fails, it is easy to replace because it's mounted externally. Only one part number needs to be stocked for spares and repairs.

Features

- 24V brushless DC motor 24V Brushless DC Motor
- 4.63" \varnothing \times 1.5" L
- Shaft 0.5" \varnothing \times 1.8" L with Keyway
- Double Front Bearing
- 22" Leads with Connector
- 4 to 100W Input
- 56-280 RPM
